Newton School
of Technology

PROFESSIONAL SUMMARY

B.Tech AI student at Newton School of Technology with hands-on experience shipping full-stack applications and production AI systems. Built and deployed an agentic RAG-based farm advisory platform using LangGraph, ChromaDB, FastAPI, and LLM inference pipelines. Brings additional experience in data analytics with Tableau and Google Sheets. Seeking AI/ML or Full Stack internships.

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School of Technology, Rishihood University	Grade: 8.286/10.0
Intermediate (Class XII)	2023 - 2024
Pace	Grade: 79.17%
Matriculation (Class X)	2021 - 2022
St Marys	Grade: 88.0%

PROJECTS

AgriMind – Agentic Farm Advisory System ([Github](#)) ([Demo](#)) March 2026

- Built an end-to-end AI farm advisory system combining a Scikit-Learn crop yield prediction model with a LangGraph-orchestrated RAG agent powered by Groq Llama and ChromaDB
- Designed a React 19 / Vite frontend with glassmorphism UI, Three.js rotating farm globe, GSAP animations, and a multi-step advisory wizard using React Hook Form + Zod validation
- Implemented a FastAPI backend hosted on Render with a vercel.json proxy rewrite to bypass CORS, enabling seamless frontend-to-backend communication on Vercel
- Delivered structured advisory reports containing crop summary, yield risk level, recommended actions, and RAG-sourced agronomic references

EduAI – AI-Powered Learning Platform ([Github](#)) ([Demo](#)) November 2025

- Developed a full-stack AI-powered education platform enabling automated explanations and quiz generation using AI APIs.
- Designed RESTful backend APIs for user authentication, content management, and progress tracking.
- Implemented secure authentication using JWT and role-based access control.
- Built responsive user interfaces with React to improve user interaction and learning experience.
- Integrated AI-powered learning assistance to generate explanations and practice quizzes dynamically.

CERTIFICATIONS

HackerRank Skill Certification In Python HackerRank ([Link](#)) April 2025

HackerRank Python Certified – Validated proficiency in Python programming, including core concepts, control structures, functions, and algorithmic problem-solving.

SKILLS

Computer Languages: Python, SQL, HTML, CSS, JavaScript

Software Packages: Pandas, Tailwind CSS, Prisma ORM, React, Node.js, Express JS, MySQL

Additional Courses: Data Structure

Others: Git and Github, Generative AI, API testing, GenAI, LangGraph, Three.js

EXTRA-CURRICULAR ACTIVITIES

Hackathon — Top 7 Finish — Buildspace · Thapar Institute Tech Fest (2026) Ranked in the Top 7 at the Buildspace hackathon. Participated in Thapar Institute Tech Fest, building two functional projects under time constraints.

Competitive Programming — LeetCode · CodeChef · Codeforces Actively solving data structures and algorithm problems to sharpen problem-solving speed and code efficiency.

Sports — Badminton · Cricket Competitive player at inter-college level — developed discipline, strategic thinking, and team collaboration.
